## Software

- 3DS Max
- Maya
- Unreal Engine
- Python
- Davinci Resolve

## Professional Summary

Highly passionate, driven and achieving 3D generalist whose areas of expertise include game, technical and cinematic animation, visual scripting and motion graphic design. Proven ability to adhere to deadlines both personal and contractual and deliver high-quality results whilst incorporating constructive feedback. Experience working full-time with both game studios and independent clients, with a general knowledge of the entire game design pipeline that proves useful in assisting at all points of a project. 5 years of industry experience within the game development scene, during which time their skills have been pivotal to the animation pipeline and helped elevate projects to their highest potential.

## Experience

### Animator (Wardogs) / Bulkhead

2024 - Present

Mid-level animator for Wardogs- a military simulation FPS.

Responsible for third and first-person animations, implementation into Unreal Engine 5, and creation of animation blueprints and systems. Additionally responsible for spearheading the motion capture processing pipeline, developed in Maya using Python.

### Lead Animator (GunJam/GunJam VR) / Jaw Drop Games

2021 - 2023

Sole animator for GunJam and GunJam VR- a rhythm-based FPS shooter.

Responsible for all aspects of animation, including rigging, creating game animations and loops, and implementation into animation blueprints inside of Unreal Engine 4.
